ABSTRACT

In this paper are described studies of the team of Prof. Momchil Dobrev and Prof. Mariola Garibova proving the truth about depression as a mental disorder based on THEORY OF THE UNIVERSUM developed by Prof. Mariola Gariova and Prof. Lord Momtchil Döbrev - Halachev in the Year 2005, Basics of the Cosmological Theory of Information and Vortex Field Theory developed by Lord Prof. Momtchil Döbrev - basic structure of the unionvrsum".

Keywords:

Depses, Theory of Universum,
Vortex Field.

INTRODUCTION

The explanation of this as depressions as a mental disorder from the point of view of the energy of the human being gives a complete picture of these diseases. It is high time for the human body to be seen as an energy system and not only to explain the human illnesses from this point of view, but it will also give specific methods of treating the diseases that traditional medicine has not yet given. Explaining the depressions from the point of view of the energy of the human being gives a complete picture and clarifies not only the nature of these diseases, but also provides ways for their better treatment. 1991 Lord Prof. Dr. Momchil Dobrev creates his theory of vortex fields and Cosmological information theory. The explanation of how information and energy is transmitted on what paths, based on Momchil Dobrev's theory of vortex fields and cosmological information theory, is a new reading and proof of what the tree of life is painted and painted by ancient 3000 to 12000 BC. Stepping on his theories Lord Prof. Dr. Momchil Dobrev, with the help of Prof. Mariola Garibova, 2005 they both developed the "Theory of Universum" and related equipment and made research based on the fact that the chakras of the person who is the energy center are double whirlwinds that work in a specific way. The results are undisputed and prove a new jade of medicine in the treatment of human diseases-physically and mentally - holistically - based on the energy of the human being. 2). Basics of the THEORY OF THE UNIVERSUM developed by Prof. Mariola Gariova and Prof. Lord Momtchil Dobrev –

Halachev in the yyear 2005, basics of the Cosmological theory of Information and Vortex Field Theory developed by Lord Prof. Momtchil DObrev 1991 Momchil Dobrev Dobrev creates Cosmological theory of information (Dobrev , 2009) and theory of vortex fields (Dobrev , 2012)- the basis of everything. In the same year Momchil Dobrev created two free energy generators using the theoretical and practical solutions of both theories, creating prototypes, but actually refusing to start regular production because he knows that all scientists and inventors create such generators soon after they are killed. The real vortex theory proves the existence of swirling fields in the fabrication of matter at the lowest to the highest level, starting from the atomic structure, to the construction of star systems, galactic systems of the universe. On the other hand, the vortex fields are also present in the construction and functioning of the human body. On the other hand, the cosmological theory of information proves that vibrations are the basis of the existence of all objects in the universe and man in particular. Even at the cellular level there are precisely defined vibrations of precisely defined frequencies and frequency spheres. Each cell, even every organ vibrates with exactly the same frequency when it is in a state of health and certain other ones when it is in a disease state. The deviation from the interval norm of the "healthy" body vibrations proves the opposite that the body is sick. In February 1985, Momchil Dobrev, under the leadership of Professor Karl Heinz von Gotte, found superconductivity, but because of the intervention of a Bulgarian state security agent then working at the Berlin embassy in Berlin and the US CIA, stealing materials and betraying them, but Momchil Dobrev Dobrev refuses, is forbidden to publish the discovery. So 1985

because of State Security cop Prof. Gote and Momchil Dobrev are not awarded the Nobel Prize in Physics. The Nobel Prize in two years has been given to two scientists from Switzerland to discover superconductivity in September 1985. - seven months after Prof. Gote and Momchil Dobrev. The vortex fields actually carry, distribute, create both information and energy. There is actually a conversion of information into energy and vice versa. In fact, on the basis of the theory of the vortex fields, the passage of the material in the process of materialization and dematerialization is undisputed, in which the processes do not lose the information. On the other hand, the vortex fields are the basis of matter and antimatter. Swirl fields emit vibrations precisely defined and at specified intervals. This is the relationship of the vortex fields with the cosmological information theory. Three distinct principles apply to each swirling system. There is a force that is at the heart of the whirlwind - in its center, and it controls the entire structure. For each imi structure swirling forces that cause the structure to strive for center, swirling forces that cause the structure to strive for external propagation, and a separate force that prevents objects from the structure from leaving the structure itself - that is, has the force of limiting the size of the structure. Vortex structures are also hurricanes. In the center of hurricanes is peace. There are chakras in the human body both at the physical level and at the other two levels, which besides supplying information and energy to the respective glands and levels and organs at these levels, but it also raises the energy to the highest level.

The whirling structure that radiates the corresponding vibration - its section Light is a vortex. Each electromagnetic wave is a whirl, the point at which both the electric field and the magnetic field are the zero point. Moreover, the space generating the vortices is geometrically based on the golden section, the numbers phi and pi. Electromagnetic wave is a whirlwind in a straight line. A basic element in the cosmological theory of information is also to note the basic principle. The single field covers and is based on vortex fields. The dissemination of energy, of information becomes unique with the swirling movements in a spiral way - right rotation. This is the easiest way to predict energy and information in the universe. That is why it is the connection of information and energy, ie. both are transmitted in the same way. Only this is the way of spreading energy and information - the vortex fields. Energy and information are not distributed on STRUMENTS. THE VORTEX FIELD and its forms are THE BASIS OF THE SINGLE FIELD. The vibrations had a swirling structure. Only the vortex structure can spread in one space - in this case the Cosmos. Spreading information into space is purely a whirlwind principle. The two theories prove that real human thought can be both a carrier of both information and energy and cause changes at the material level and at the spiritual level. There are 12 dimensions of consciousness, the basics of which are types of vortex fields. Only On the first density level (first, second and third dimension) lies our incarnate self. At each density level corresponds a certain type of matter and type of consciousness - that is, an information field with an information structure for the relevant plurality level. Our first harmonic universe, or that of Earth, we have a biological structure that is based on carbon and matter is on a physical level. In the depths of a harmonious universe where our souls inhabit, there is a silicon-carbon biological structure, and matter is on a physical-etheric level, also called a semi-etheric level. In a third harmonic universe, the creatures are composed of

crystalline silicon and the matter of net is entirely etheric. The biological structure of the fourth harmonic universe, where the current levels of consciousness or the state of its current state are found, is a "crystalline liquid light," and the particles at that level are called premastery. Dimensions 13, 14 and 15 at five density levels are composed of antimatter (other than antimatter) and the biology of the beings there is called "crystalline light radiation". At the three levels above this dimension, namely polaris, triadic and ecuatec levels, the beings are of pure consciousness and these levels are not considered dimension. Our soul includes us and eleven incarnated personalities, or a total of twelve people. Our soul together with another 11 people forms our air. Accordingly, the smell is composed of 144 incarnated personalities. Twelve halves make up the Christ avatar, which includes 144 people and 1,728 incarnate personalities.

Accordingly, 12 Christ avatars are connected and make up one rhesus adept. The relics of the Adept include, in turn, a further 144 breaths, 1,728 people and 20,736 incarnate figures. All 12 personalities of the soul are placed in the so-called time vector. They are arranged as the clock on the dial is marked. In this way, 6 pairs of born persons are formed. These are 1 and 7, 2 and 8, 3 and 9, 4 and 10, 5 and 11, 6 and 12. Most energy is allocated to pairs 12 and 6 as well as to pairs 3 and 9. These personalities are called "(the ethics" faces of the soul ". Most often position 12 is a man and position 6 is a woman. They have the same DNA template. Clearing the link with your own avatar helps strengthen everyone's biofields and creates protection from negative intrusions up to 12 dimensions. The avatar is part of the multidimensional identity structure and corresponds to Mahara - this is the body of the fourth harmonious universe. The avatar includes the 10 dimensional mind, the mind of the 11th dimension and the nirvana mind of the 12th dimension. Avatar avatance is a 12-dimensional level of consciousness that can be achieved at the biological level with full activation of a 12-stranded DNA template. In catara, this DNA template is called a genetic footprint of the tagged matrix as well as DNA. When one integrates its avatar level, it changes its perceptions of time space and matter and submits the so-called multiverse consciousness of the 12th dimension. Multiverse consciousness is an enterprise and an ability to interact with our minds, souls, and our personalities, who are in different spatial-temporal realities 8 years ago in the past or the future / The iovidvid becomes capable of moving freely between the 12 dimensions - to ascend and descend into the four density levels.

This gain is possible after activating the 12 levels of DNA template threads. Another ability that the avatars have is to have a galaxy's memoir. This awakening is synchronized with raising the vibration of a morphogenetic field, and most avatars are awakened to levels when the vibration of the paid one rises. Initially the integration of human identity took place in a life like human form, it was eternal, and the person did not die, but ascended to a higher harmonic universe. This passage has occurred with the physical body through which the process of atom transmutation takes place. Because of the deformations in the morphogenetic field of the Earth, deliberately conceived by other stellar rays, this process was the precursor, and people's lives began to be realized by successive incarnations. The reincarnation was not the evolutionary process of the human race, but it began to work more than five and a half million years ago.

Levels of consciousness - an aspect of myself

- physical level, physical body, survival instincts
- Emotional, sexual, emotional,
- will - intellectually, rationally logical - ego - lower mind.
- Mental, Intuitive, Creative, Astral - Higher Mind.
- Love, union, the only, etheric - heart light body
- causal level, vicious life - causal body.
- Pure Essence Higher Self - Soul
- Higher reason wisdom, knowledge - superstitious
- Celestial Consciousness - Monad
- Cosmic consciousness - Christ / Buddha essence
- Intergalactic consciousness - individual and divine essence
- Universal consciousness - a universal divine essence.

Beyond the 12th great mystery the emptiness - divine consciousness / peaks god.

Flexibility

- material kingdom
- level - plant
- animal - animal
- level - human beings.
- level - etheric light body
- level - causal body
- level - the soul, the angels
- level the superstition, the archangels
- Level Monad, Ascended Teachers.
- level - the great central sun.
- level of all-galactic universe.
- level - gods creators.
- level - divine consciousness the emptiness, the unknowable.

Achieving a higher state of consciousness is associated with making a change in density, ie. evolving from a form of life from a lower order to a higher-form life form.

Dimensions

- level - coaching
- level location
- level depth, size, physical plan.
- level-time thought, asparagus
- level-love, the only, planetary plan
- level-causal plan, acoustic records.
- plan of the house, low heavenly spheres.
- the supernatural, intermediate celestial divisions.
- monad, high heavens.
- Paradise / Worshipping Worlds.
- The universe
- other universes
- divine consciousness.

COLORS of corresponding levels of consciousness and corresponding levels of dimensions

- Red Level
- Orange level

- Level - Yellow
- Level - Green
- Level - Pink Higher Heart
- Level Blue - Throat
- Level - Indigo - third eye
- Level - Violet - the crown of the head
- Level - Silver - over the crown
- Level - Gold - Christ's self
- Level White - Divine self
- Level Clean - universal essence
- Level Black - the emptiness.

Theory Of The Uniersum

The theory of unievrsun , which in turn distinguishes:

- "energy-information genetics",
- "energy-information psychology"
- "energy-Information Psychiatry"

On the basis of the Cosmological Information Theory and Vortex Theory Theory, Mariola Garbova and Momchil Dobrev elaborate 2005. Theory of Universum. We will briefly state that, based on the research of the human energy system and how it affects precisely defined diseases such as the identification system and consequently as a method of therapy and healing, it has been proven that the chakras actually represent the human energy centers double swirls that can rotate both on one side and the other. The interdependence of man's energy is energetic in the environment at both the conscious and the subconscious level, he has demonstrated the connection of human states, diseases, diseases, to the state of man's energy system - chakras, energy flows, consciousness, subconscious. In fact, diseases that have been studied by Mariola Garibova and Momchil Dobrev have found an easy and adequate explanation. This, in turn, not only provides an explanation for the types of illness, but also gives a realistic guide to their therapy holistically - ie. complex - physical and spiritual - ie. energy.

Based on these studies, the following sections of medicine, biology, psychology, genetics,

- "energy-information genetics",
- "energy-information psychology"
- "Energy-Information Psychiatry"

Since the current article allows for such a voluminous viewing of matter that requires a monograph of at least 1500-2000 pages, we will give the results briefly below.

Depression - types, symptoms, signs, social problems, physical problems – shortly One of the areas that Mariola Garbova and Momchil Dobrev with his team of researchers was and is psychology and psychiatry - respectively depression and its types. So here we will briefly describe the main directions on which the research results are obtained. Depression is the general happening of a feeling of melancholy, despair, helplessness, stupidity, sadness, Melancholic Depression Loss of interest or pleasure from activities that usually deliver joy Early wake up in the morning Reduced emotional reactivity in terms of positive stimuli of the environment - lack of emotional response to pleasant experiences Symptoms Of The Depression – shortly

Some people experience several symptoms. The severity of symptoms of depression varies depending on physical persons and also varies over time.

Symptoms

A sense of complete apprehension, hopelessness and meaninglessness of everything.

- Persistent sadness and depression
- Feeling anxious and helpless
- Feeling emptiness
- Anger and irritability
- Feeling guilty
- Loss of confidence
- Lack of interest in everyday activities indifference
- Lack of motivation "chronic fatigue, lack of energy, lethargy
- Difficulties in concentration, memory disturbances
- Difficult decision making, passivity
- Inability to test pleasure
- Fear of the future
- Thoughts or suicide attempts
- Eating disorders, loss of appetite - weight reduction
- Increase in appetite - Weight gain
- Sleep disturbance, wheezing/insomnia, early awakening, feeling of fatigue after normal longer sleep/

Recognition Of Clinical Depression

- Seriously sad, anxious, or "empty" mood
- Feelings of ignorance, pessimism
- Feeling guilty,
- A sense of futility
- Feeling helpless
- Loss of interest or pleasure from hobby, action,
- Reduced energy
- Fatigue
- Difficulty concentrating, remembering, making decisions
- Insomnia
- Early co-awakening
- Appetite
- Think of death
- Think of suicide
- Suicide attempts
- Feeling anxious "Feeling irritable

Social Problems

- Insulation,
- Lack of interest in sex and / or lack of sexual desire
- Lack of enjoyment
- Difficulties in the relationship
- Social withdrawal
- Social withdrawal from contact with people

Physical Problems

- Feeling of physical exhaustion, headache, back pain, stomach pain, pain

RESEARCH OF THE DEPRESSION FROM PROF. MARIOLA GARIBOVA AND PROF. MOMCHIL DOBREV based on Theory of Universe, Cosmological Theory of Information and Theory of Swirl Fields. On the basis of the Cosmological Theory of Information and Theory of the Viper Fields of Momchil Dobrev, both Momchil Dobrev and Mariola Garbova develop Theory of the Universe as part of this theory:

- "energy-information genetics",
- "energy-information psychology"
- "Energy-Information Psychiatry"

Signs For Clinical Department

- Still sad, trembling, gloomy and "festive"
- Feeling guilty
- Loss of interest or pleasure from favorite hobbies and activities, including sex
- Reduced energy, fatigue
- Difficult concentration, difficult decision-making
- Insomnia, waking up early in the morning
- Lack of appetite and weight loss, systemic overeating and filling
- "Mills for death, real attempts to kill
- Anxiety and irritability
- Feeling hopeless and helpless
- Low self-esteem
- Continuous guilt or futility
- Loss of motivation
- Indifference

RESEARCHES of Prof. Momchil Dobrev, Prof. Mariola Garibwa and Aleksandyr Garibov with equipment from the Dobrev-Halachev Scientific Research Institute - created by Prof. Momchil Dobrev More than 47 studies have been carried out on people with depressions with scanning apparatus, a device that scans the patient's energy system, and takes into account the energy of each of the seven main chakras, the auratic fields of the patia, where and what kind of energy - what color of energy .

The apparatus shall account for:

- blockages of the respective chakras - level, degree, blocking force,
- where the blocking from the front or back comes from,
- direction of blocking - from inside out or from inside out
- energy threads included in both the mind and the subconscious level.
- Chakra color, change, color,
- Turn on another color of energy in the chakra -
- Turn on another power source
- Degree of switching from an external source from an external source behind the chakras
- Color of switching on a new power source in the chakra.
- Include this energy source - field and another chakra.
- Switching color of another source of energy
- Color of energy source at sub-level
- Color of energy source at the level of consciousness
- Energy contamination of the chakra by the patient himself - his consciousness
- Energy contamination of the chakra patient from another source at the level of consciousness

- Energy contamination of the chakra patient from another source at the subconscious level
- Energy contamination n

It is also known that energy bonds connecting the patient's energy field are in front of the chakras, and which ones are behind the chakras. What energy objects are connected to the patient's energy system. What the research has shown and confirmed in identical cases of patients' disease: Particular patient results confirmed in patients are similar symptoms.

1. Example - patient with depression - energy connected at the back of the fifth chakra - color of the energy input of the other source at the moment of switching - gray. Result - Patient does not speak to him at the moment of inclusion. The emergence of a gray energy field at sixth and seventh chakras.

2. Example - patient with suicidal depression - energy-connected at the back of the first chakra - color of the energy input of other source - at the moment of insertion - gray-black. Result - the patient wants to kill himself. Appearance of a gray energy field at the level of the fourth, fifth, sixth and seventh chakras.

3. Example - a patient with depression - feeling guilty - energy-connected in the front and / or back of a second chakra. In the rear connection - the color of the power switch is gray.

- At the front - in the direction of blocking a second chakra from the inside out - the chakra pollution - brown.
- At the front - in the direction of blocking a second chakra from the outside to the inside - gray, black - brown.

4. Example - a patient with fearsome psychosis - an energy spiral on the front and / or the back of the first chakra.

5. Continuously sad, jarring, gloomy and "festive" Patient - first and second chakra.

6. Loss of interest or pleasure from favorite hobbies and activities, including sex

7. Reduced energy, fatigue - energized on the fourth front panel chakra

8. Difficult concentration, difficult decision-making - third chakra, fourth chakra, six chakra

9. Insomnia, waking up early in the morning Lack of appetite and weight loss, systemic overeating and filling

10. Thoughts of death, real attempts to wipe - blocked first chakra

Appearance of a gray field in the second clock

11. Anxiety and irritability -

12. Feeling sorrow, hopelessness and helplessness - the fourth chakra, the first chakra, the sixth chakra.

13. Low self-confidence - the third chakra and the sixth chakra

14. Continuous guilt or futility - second chakra, third chakra

These are the results that the corresponding patient condition is confirmed by the patients concerned.

Conclusion

The above results show that only a complete and complementary energy study of human energy will give a clearer picture of its illnesses and provide better and more specific treatments and treatments. The human organism has to be holistically dissolved as an energy system that contains not only physics but also energy - soul.
